

THE AFFORDABLE DIGITAL HOME IS HERE

AUDIO • VIDEO • LIGHTING • CLIMATE • SECURITY • SHADES • IRRIGATION • APPLIANCES

THE NEW DIGITAL HOME

The convergence of home control and home entertainment systems is one of the most exciting recent developments in home technology. The Cortexa Technology home control system is now integrated with Microsoft Media Center to enable you to control all of your home systems using the same intuitive interface you use today to enjoy your digital media. My Pictures, My Music, and My Videos are now accompanied by My Home on the Microsoft Media Center start menu. My Home lets you control all the sub-systems in your home – audio, video, lighting, climate, security, shades, irrigation, and AV appliances.

OUR WAY	THEIR WAY
Affordable fixed price	vs. "It depends", expensive
Easily customizable	vs. You'll need help
No software license fees	vs. Device license fees
Open, standard components	vs. Proprietary components
No hidden costs	vs. Keep your wallet handy

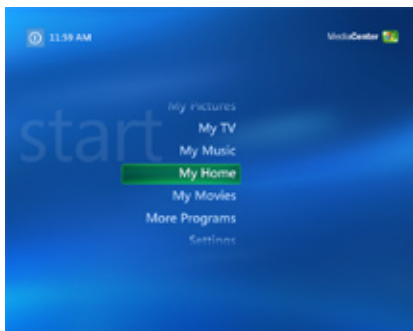

FINALLY IT'S AFFORDABLE

Well designed and implemented home control systems make your home safer, more convenient, and more efficient. Until now, most systems have been prohibitively expensive – enter Cortexa. No other system on the market delivers the functionality and ease of use at such an affordable cost. You'll see what we mean if you go and speak to our over-priced competitors.

YOUR CHOICE OF ACCESS POINTS

Used with Media Center, or standalone, all screens are completely intuitive. Choose from a range of access points from which to view and control your home. Whether using a TV, in wall touch panel, webpad, PDA, or the Internet, the same intuitive user interface makes sure you can quickly and easily monitor and control your home from wherever you are, anywhere in the world.

FEATURES

- Use with Media Center or standalone
- Cortexa home control software
- Highly intuitive user interface
- Access from TV, touch panel, webpad, PC, or PDA
- No programming language to learn
- Easily configure events with simple menu driven selections
- Choice of home sub-system technologies and devices
- Effortlessly add other sub-systems when you want
- Solid state design for superior reliability
- Built-in web server to control your home from the Internet
- Networking capabilities including a built-in router
- Video archiving and PTZ camera support
- Free on-line software upgrades

THE CORTEXA CONTROLLER

The Cortexa controller is the brain of the home. All controllers come with the full Cortexa home control system installed, ready to be easily configured to your home. Imagine the convenience of your “Goodnight” event. Your interior lights all turn off, the outdoor security light turns on, garage doors close, security system arms, heating and cooling resets and TVs and stereo equipment turn off....all with the touch of a single button.

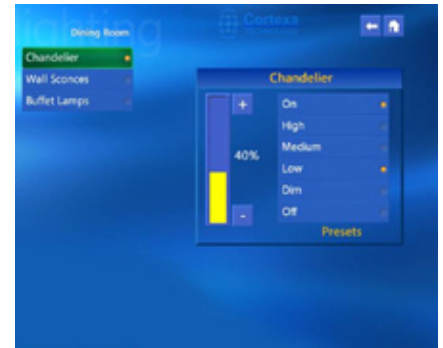

PROPRIETARY SUB-SYSTEMS NOT SOLD HERE

Whether it's lighting, audio, security or any other sub-system, you will find that Cortexa has already integrated with the best of breed and industry-leading solutions to meet your functional and budgetary needs. We'll leave the proprietary products and sub-systems that limit your choices to our competitors. Visit our website to see a full list of Cortexa compatible products.

BECAUSE IT'S YOUR HOME

Packed with many exciting features, Cortexa lets you tailor the system to reflect your home like no other digital home system. You can even import photos from your own home. For example, irrigation zones are always difficult to remember and describe. Simply take a photo of the area covered by each zone, import it into your Cortexa system and you will never again have to remember which sprinkler head covers which part of your yard. Simple, fast and customized just for you, by you.

Visit our website now to see what a Cortexa system can do for **YOUR** home.
